

?How do I follow up automatically when a user stops replying

Eloise Rea - 2023-09-07 - Comment (1) - Ticket Structure

When a user stops replying without confirming the problem is resolved, it's a good idea to follow up and check what happened. Did they stop replying because your last response solved their issue, have they forgotten about it, or just got frustrated and given up

A Follow Up workflow can be quickly created using the in-built Escalations under the ticket .status Awaiting User

Under **Admin > Ticket Structure > Statuses** click on the status **Awaiting User**. From .here, you can set the amount of time to wait before the first warning and final warning

If you want a more customized approach, this can be done by creating an Escalation under **Admin > Business Rules > Escalations**. From here, you can choose to only send this on .custom criteria such as when the department is Support

After you create these Escalations, it will automate a key step in your support and means .your Agents can never forget to follow up on an issue with a customer
