

How do I prevent a specific agent being assigned tickets

Matthew Watt - 2023-08-10 - Comment (1) - Admin

Ticket Assignment overrides Department Permissions, which means even if you have an agent that doesn't need to be assigned tickets, they could still accidentally be assigned tickets by other agents

If you have a specific agent that doesn't need to be assigned tickets, you can create a **Ticket Update Trigger** to unassign tickets from them automatically. This is useful in the event another agent accidentally assigns them a ticket

Simply, go to **Admin > Business Rules > Triggers > Ticket Update Triggers**, and click the **New** button at the top right

Depending on how you want the action to run, you can either: **1) Create a Trigger that automatically assigns the ticket back to the agent who made the change**, or **2) Create a Trigger that automatically moves the ticket back into unassigned**

:Option 1

To automatically assign the ticket back to the agent who made the change, create a trigger with the following settings

:Option 2

To automatically move the ticket to unassigned, create a Trigger with the following settings
