

How to display a ticket custom field in an email template or portal template

Ben Henley - 2023-08-31 - Comment (1) - Deskpro Legacy

Ticket custom fields can be added to triggers, escalations, email templates and user portal templates. By adding a custom field item ID in a variable and including it in a trigger subject line or email template, it is possible to reference that custom field and populate the .subject or template with the respective field

:Custom fields in Trigger Action 'Set Subject

In order to add custom fields to the subject of a ticket through the Trigger automation, you will need to

1. Find the ID number of the field

2. Replace the N in the following variable `{{ticket.fieldN}}` with the ID number of the .field

3. Add the variable to the 'Set subject' Trigger Action. Depending on the type of trigger, this setting will prompt a change to the ticket subject line which will be populated by the custom .field instead

:Custom fields in Email templates

In order to add custom fields to Email templates, you will need to

1. Find the ID number of the field

2. Replace the N in the following variable `{{ticket.renderCustomFieldN | raw}}` with the ID .number of the field

3. Add the variable to the Email template and then Save

:Custom fields in Portal templates

In order to add custom fields to Portal templates, you will need to

1. Find the ID number of the field

2. Replace the N in the following variable `{{ticket.renderCustomFieldN | raw}}` with the ID .number of the field

.Add the variable to the Portal template .3
