

## I'm having trouble receiving notification emails when I create a ticket

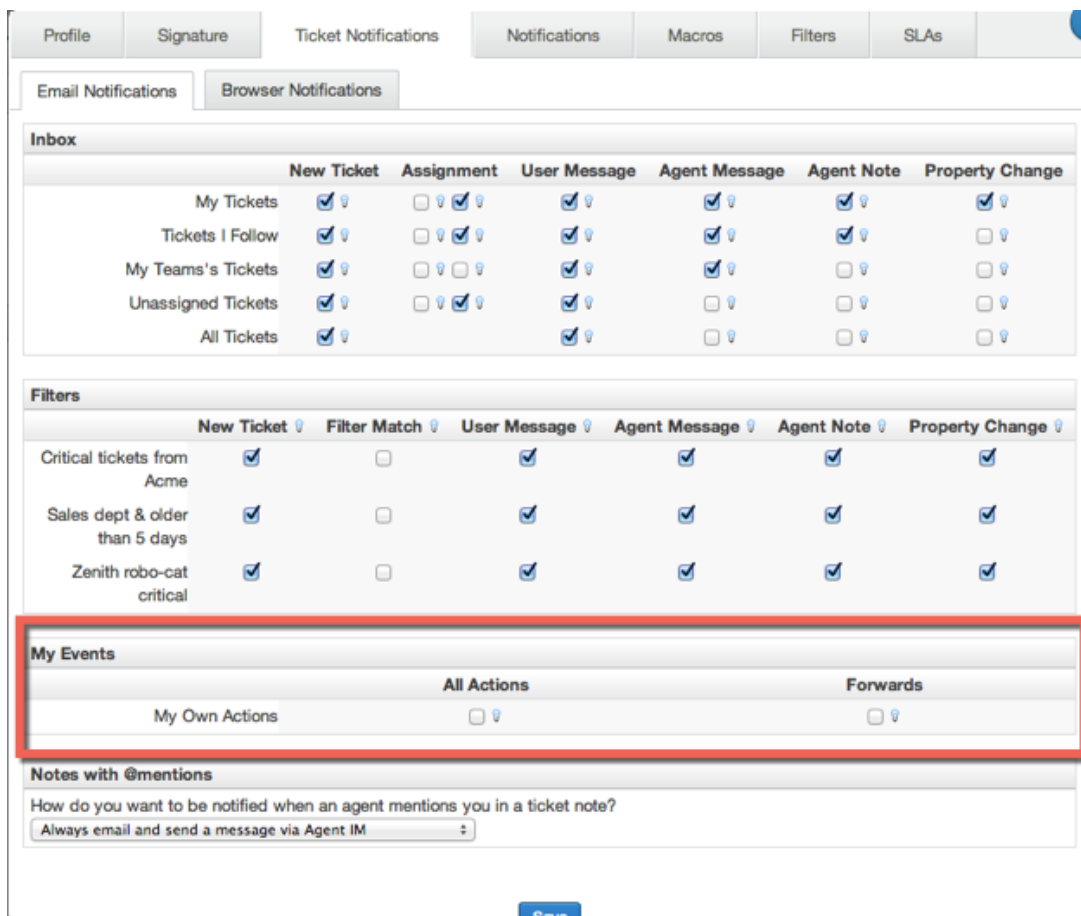

Ben Henley - 2023-08-31 - Comment (1) - Deskpro Legacy

### :Question

I'm trying to test email notifications. I make myself a test ticket and I don't get an email.  
?Other automatic emails seem to be working. What's wrong

### :Answer

By default, you don't get notifications about your own actions on tickets, including creating .them

The screenshot shows the 'Ticket Notifications' settings page in Deskpro Legacy. The 'Email Notifications' tab is selected. The 'Inbox' section shows notification preferences for various ticket categories. The 'Filters' section shows notification preferences for specific filters. The 'My Events' section is highlighted with a red box, showing 'All Actions' and 'Forwards' settings. The 'Notes with @mentions' section shows a dropdown menu set to 'Always email and send a message via Agent IM'.

Notes with @mentions

How do you want to be notified when an agent mentions you in a ticket note?

Always email and send a message via Agent IM

Save

If you want to enable email notifications for your own actions, go to your **Preferences** at the top left of the agent interface, and change the **My Own Actions** settings under **Email .Notifications**
