

I'm having trouble getting Jira-related triggers to work

David Anjonrin-Ohu - 2023-08-10 - Comment (1) - Admin

:Question

I've installed the Jira app within Deskpro and set it up. I notice some new Jira-related trigger criteria and actions that don't work. What's wrong?

:Answer

After you've installed the app, you need to do a little more configuration of inbound webhooks in Jira before you can use Jira-related triggers and actions.

.Check out [our guide](#) to learn how to use Jira with our Triggers system.
