## I'm having trouble with being redirected to the wrong helpdesk address

James Godwin - 2023-08-24 - Comment (1) - Configuration

### **:Question**

I changed the IP or custom domain for the helpdesk. Now, when I try to visit the Help Center ?or the agent interface, I get redirected to the wrong address. How can I fix this

### **:Answer**

You should be able to access the admin interface at *yourdomain.com/app#/dashboard* on the new address. Go to **Admin > Configuration > Brands** and update the **Helpdesk .URL** setting
