

## Number of times 'Downloads' have been downloaded in the user portal

Lauren Cumming - 2023-09-08 - Comment (1) - DPQL Examples

### Question

I would like to know if there is a way to track how many times files are downloaded from our ?support portal

### Answer

You can build a custom report to get this information: **Reports > Stat Builder > :Add.** Enter a title and description for your report and the following query

```
SELECT downloads.id, downloads.date_created, downloads.title, downloads.num_downloads  
FROM downloads  
ORDER BY downloads.num_downloads
```

You can also add downloads.num\_ratings to the SELECT line if you want to see number of .ratings per download too

. There is a full list of download schema [here](#)
