

QR Code for Mobile App

Emily Booth - 2018-12-10 - Comment (1) - Using Deskpro

If you need to find your QR code in order to access the Deskpro Mobile app, then you can find this in your agent preferences

When you open your preferences, you will see your QR code when you scroll down, along with a refresh button. This QR code will grant you access to your mobile app, but if you experience any difficulty please email us at support@deskpro.com
