:New Features

The following features have been automatically available for new customers and available for existing customers to test for a few months, however, we are officially launching these today

- New [Help Center Theme](#) for the portal
- New [Messenger widget](#)
- [Improved Email Templates](#) (including a new template editor)

Additionally, we have some other exciting new features available from today

- Control whether Pending status is counted in SLAs and ticket waiting times. Find out more [here](#)
- Report on user waiting time and first reply time within working hours. Find out more [here](#)
- Trigger criteria for custom date fields now support selecting a relative time in the future (e.g 2 days/months/years from now)

:Bug Fixes

- CH-15792 - Intermittent error caused when a user approves/rejects an Approval request via the portal
- CH-6074 - Prevent Agent permissions from causing an error when an Admin tries to add an Approval type
- CH-14658 - Ensure the default values for built-in fields (e.g. Category or Product) are displayed in the contact form when a parent/child hierarchy is being used
- CH-14823 - If you apply a Macro from the reply button which should send a reply and unassign the ticket, the ticket is not changed to 'unassigned'
- CH-15662 - The toggle to enable/disable Guides for the portal isn't working
- CH-11022 - The Snippet manager closed automatically after clicking the 'Languages' menu when a language pack has been uninstalled
- CH-15431 - Don't display the shortcut code for snippets that are removed when a language pack is uninstalled
