

Deskpro 2022.1.0 Release

James Godwin - Comment (1) - Release Announcements - 2022-03-09

We are pleased to announce the release of **Deskpro version 2022.1.0**. This is a bugfix .release

Bug Fixes

SC - 63890 - Move Google fonts loading to product and allow to disable it •

SC - 64608 - Add an existing user as a CC, then add a new user as a CC, receive an •
incorrect error message pop up

SC - 64116 - Missing attachment source_ref's •

SC - 61472 - Help Center Theme - switch from legacy portal to new help center •
theme not changing

SC - 56399 - HELP CENTER - Calendar pop up selection does not update field on user •
form

.SC-62064: 500 error in some cases when using the API to create new tickets •

SC-62069: Temporary blobs being served after being abandoned. This could be •
abused to upload files that agents couldn't delete easily, but with permalinks that
would still work. See [this KB article](#) for a fuller explanation and mitigations to handle
.pre-existing temp blobs
