DeskPRO Build #303 Released

Chris Padfield - Comment (1) - Release Announcements - 2013-09-26

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #303

:The following is an automatically generated list of changes in this release

• FIX PHP error when user who is not logged in submits new feedback from account that already exists and the 'require login' option is enabled

• FIX Possible error during grouping when no tickets match

• FIX Possible JS error could cause ticket tabs to break sometimes during load. .Reloading would fix the problem

• FIX Prevent double-loading chat when snippet is included twice on same page

• FIX Correct link to APC info displayed during installer

• FIX Better handling of exceptions thrown during rendering of custom templates (e.g., (bad route name

• FIX Refreshing the agent interface when you had an open ticket grouping could show an empty white box under the ticket title

• FIX If an agent submitted a ticket (i.e., they started a ticket in a user context), they would see notes in the ticket history of user email notifications

• FIX PHP notice on a possible 404 when viewing ticket

• FIX Custom date fields did not show datepicker on org and user profile tabs

• FIX Stop re-loading the ticket unnecessarily when changing departments when using custom fields with custom layouts

• FIX After removing a CC from a ticket, attempting to remove another would not work

• FIX Newly created organizations would not be visible under Ticket Search until you did a page refresh

• FIX Switching file storage location (db to fs or fs to db) would not move existing blobs via the scheduled task as it should

• FIX Trigger criteria on 'labels' did not apply properly in some cases

• FIX A number of incorrect descriptions for trigger term criteria when using the 'is not' operator

• FIX Trigger term criteria description for usergroups when 'everyone' or 'registered' is selected

• FIX Background image on org tabs that have an org picture uploaded
