

DeskPRO Build #47 Released

Chris Padfield - Comment (1) - Release Announcements - 2012-07-10

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #47

:The following is an automatically generated list of changes in this release

- Fix blank department names in chat win •
- Fix setting category/product/priority on new ticket when theyre enabled •
- (Remove old files with system call to rd (win) or rm (nix) •
- Fix ticket message on new ticket not setting proper creation system •
- Send email notifs even when browser notifs were sent •
- .Updated all lang files with phrase ID column set to 70 chars •
- Make phrase ID column fixed-width at 70 chars. Before it would take the longest •
- phrase ID and use that for all lines. This meant if you added a phrase with a longer ID, then every line would change to the new longest lenght. Then in a git diff, every .line would show as changed simply because the spacing changed
- Add other lang ID's to lang manifest, enable japanese •
- Fix stats not generating on cron •
- Fix error 769: 'strtolower() expects parameter 1 to be string' with subject match •

If you are using the cloud version of DeskPRO, your account will have already been updated .or will be updated within the next 24-48 hours
