

DeskPRO Build #47 Released

Chris Padfield - Comment (1) - Release Announcements - 2012-07-10

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #47

:The following is an automatically generated list of changes in this release

Fix blank department names in chat win •

Fix setting category/product/priority on new ticket when theyre enabled •

(Remove old files with system call to rd (win) or rm (nix •

Fix ticket message on new ticket not setting proper creation system •

Send email notifs even when browser notifs were sent •

.Updated all lang files with phrase ID column set to 70 chars •

Make phrase ID column fixed-width at 70 chars. Before it would take the longest •

phrase ID and use that for all lines. This meant if you added a phrase with a longer

ID, then every line would change to the new longest lenght. Then in a git diff, every

.line would show as changed simply because the spacing changed

Add other lang ID's to lang manifest, enable japanese •

Fix stats not generating on cron •

Fix error 769: 'strtolower() expects parameter 1 to be string' with subject match •

If you are using the cloud version of DeskPRO, your account will have already been updated .or will be updated within the next 24-48 hours
