

DeskPRO Build #60 Released

Chris Padfield - Comment (1) - Release Announcements - 2012-07-23

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #60

:The following is an automatically generated list of changes in this release

- fix parse error in PersonFromEmailProcessor •
- Bad isChildOf causes attachNode to fail. We dont need this check so its a quick fix •
until official fix
- Updated languages: Japanese - Japanese: Added 298 phrases •
- Handle email from unregistered user but registrations are closed (eg. support •
(usersource-only
- Fix debug print_r, set domain in findIdentityByInput too •
- Add mapping between usersources and custom data field •
- Improvements to usersources and AD - Fix editing usersources not saving - AD better •
maps email field based on principal name if no email defined - Any usersource can
add find_identity capability - Gateway will try to find user from email address in
find_identity capable usersources
- Remember me login should be active from first load, not after redirect •
- Autolink: Catch www.'s without http:// and no path •
