

## DeskPRO Build #60 Released

Chris Padfield - Comment (1) - Release Announcements - 2012-07-23

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #60

:The following is an automatically generated list of changes in this release

fix parse error in PersonFromEmailProcessor •

Bad isChildOf causes attachNode to fail. We dont need this check so its a quick fix • until official fix

Updated languages: Japanese - Japanese: Added 298 phrases •

Handle email from unregistered user but registrations are closed (eg. support • (usersource-only

Fix debug print\_r, set domain in findIdentityByInput too •

Add mapping between usersources and custom data field •

Improvements to usersources and AD - Fix editing usersources not saving - AD better • maps email field based on principal name if no email defined - Any usersource can add find\_identity capability - Gateway will try to find user from email address in find identity capable usersources

Remember me login should be active from first load, not after redirect •

Autolink: Catch www.'s without http:// and no path •
