DeskPRO Build #69 Released

Chris Padfield - Comment (1) - Release Announcements - 2012-07-25

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #69

:The following is an automatically generated list of changes in this release

• Offline message takes precedence over not-built error. Fixes error screen in user interface while new files are being moved into place

• Userchat phrases are raw

• Fix setters on Stat

• Fix html phrases

• Update JS phrase util to auto-escape for consistency with PHP one. Update uses in chat to use raw, as those locations already handle escaping.

• Fix viewing error log item always showing first log

• on invalid usersources 404

• Add getIdFromCode self-contained in SessionEntityStorage

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
