

Deskpro Horizon Release 2023.29

David Anjonrin-Ohu - Comment (1) - Release Announcements - 2023-07-18

We are delighted to announce to you the latest release of Deskpro Horizon, 2023.29. This update includes bug fixes and improvements to the product which aim to improve your productivity and user experience

Latest Improvements

.(Added Welsh translation for Help Center (SC 118287)

Changed the position of the run buttons for applying Macros in tickets. They now display in the row when hovering over it in the list, as opposed to in the preview. You can now also use your keyboard to navigate this list and select your desired run option (SC 110334

Improved the user experience of using the CSV importer with added loading indicators, the ability to cancel imports, and a fix to autocomplete being triggered unwantedly (SC 108962

Added a tooltip to the category paths of Articles in the dropdown for Global Search results (SC 112165

Bug Fixes

Allow Brands to be attached to a User via our CSV importer as long as the column contains a match for an existing Brand's name, slug or ID (SC 112316

Stopped HTML in code blocks being rendered instead of being presented in its raw form in Help Center content (SC 102074

Fixed the formatting of date, date&time and currency fields in Ticket change notification emails (SC 113609

Improved our support for repositioning images by dragging and dropping in the text editor (SC 97853

Fixed a bug which would make it difficult to edit the position field on a User's CRM profile (SC 111346

Fixed an error where the User was not properly identified on a missed chat if they weren't logged in beforehand (SC 117727

.(Fixed a phrase typo in one of our default Help Center templates (SC 110068 [□](#))

Improved the logic which decides the reply box channel tab which should be opened by [□](#)
.(default when you first open a ticket (SC 85424

Fixed an issue which caused the billing tab on a ticket to disappear when pausing the [□](#)
.(billing timer (SC 115285

.(Updated outdated phrases in Help Center error templates (SC 106488 [□](#))
