Deskpro Horizon Release 2022.39.0

Lara Proud - Comment (1) - Release Announcements - 2022-09-28

We are delighted to announce the release of Deskpro Horizon version 2022.39.0, this release includes some ticket optimization work to enhance your experience as Deskpro users, several other improvements, and bug fixes.

Our newest feature

[We have optimized the UI responsiveness to improve the loading speed of tickets](#) (SC 87398 & 86069).

The latest improvements

☐ When a User is responding to a ticket via the Help Center ticket reply form, a draft of their message gets saved if the session times out or expires before they click 'Reply' (SC 79313).

☐ We have added validation for Users when uploading images or avatars from the Help Center (SC 86917).

☐ We have removed font smoothing to increase the density of the font type and make text in the interface more legible (SC 87706).

☐ We have improved the layout of the ticket message UI when the message includes an attachment to ensure that email content cannot overflow the ticket in both the Agent interface and Help Center (SC 82593).

☐ We have improved how the OAuth2 email fetching system functions to enhance the speed at which emails are processed and turned into tickets (SC 70962).

Bugs we fixed

☐ We have fixed the issue where the Snippet shortcode menu would disappear after a second character is entered (SC 86892).

☐ Fixed an issue where unpublished files were still accessible from the Help Center's related content block (SC 69501).

☐ We have fixed an issue where an Agent's draft message would not be visible to another Agent unless they refreshed the ticket (SC 87044).

.(We have fixed a bug that affected Agents resetting their passwords (SC 86761 ⬜

We fixed an issue where the search count on the Help Center didn't match the number of ⬜
.(results (SC 85336
