

Easily filter your Community Topics with Lists

(Lara Proud - Comment (1) - Product (Agent) - 2024-02-06)

Continuing with our updates on the way you manage and filter your information in the .helpdesk, we are introducing the Lists feature to Community

This enhancement will help broaden Community capabilities by enabling agents to create custom no-code lists of your Community Topics. Agents will be able to form lists with the .simple 'is/is not' filtering capabilities already available for Tickets and in the CRM

The screenshot displays the Deskpro interface for managing community topics. A table lists various topics with columns for ID, Title, Forum, Status, Votes, and a user icon. The status column shows different states like 'Active', 'Collecting Feedback', 'Closed', 'Done', 'Under Review', and 'In Development'. A sidebar on the right contains a 'Filter' section with a search bar and a 'Clear' button. Below the search bar, there are sections for 'Date / Time' (Date Created, Date Updated, Date Published) and 'Properties' (Title, Content, Author, Status). A dropdown menu is open, showing options for 'Is' and 'Is Not' filtering, with a search bar and a list of status options: 'Active' (checked), 'Closed', and 'In Development'. At the bottom of the sidebar, there is a 'Clear all selections' button. The main table has a search bar at the top with the text 'community_topic.id = 3'. The table footer shows 'Items per page: 100' and '1-12 of 12'.
