

Introducing: Linking Tickets to Feedback

Benedict Sycamore - Comment (1) - Product - 2018-03-19

We have now introduced a way to link tickets to one or more feedback items. This is useful for scenarios where a customer submits a ticket that you want to turn into a feature request.

The new update allows you to

- Link tickets to feedback items, and display the link in both ticket and feedback views so agents have full visibility. Tickets can be linked to multiple feedback items, and feedback can be linked to multiple tickets
- Search for tickets linked to a particular feedback item, or search for tickets "with a link" to any existing feedback

How does the new feature work

To link to feedback from a ticket, the "Link Existing Feedback" and "Create Linked Feedback" options are available from the Actions menu

Link Existing Feedback displays a search box where you can enter feedback title or an ID to find the feedback item you want to link the ticket to

Create Linked Feedback opens the New Feedback tab. The New Feedback shows a message at the top saying it's being created as a linked item to the ticket

After a ticket has been linked to feedback, a "Linked Feedback" tab is added to the ticket Properties box. This simply lists the linked feedback with an "x" icon to remove the link

How can I start using the new feature

If you are using Deskpro Cloud, we will roll out this update to your helpdesk soon

If you are using Deskpro On-Premise, you can update your helpdesk to the latest version
.from your Admin Interface

We look forward to receiving your feedback about the new article editor, and wish you all
.the best in the meantime
