## New: Email Action Codes

Chris Padfield - Comment (1) - Product - 2013-05-01

Agents can now perform actions on tickets by entering special action codes to the top of their emails. Here's an example assigning an agent, setting the awaiting agent status, setting the priority adding a note

agent john@example.com#
#status agent
#priority urgent
#note

John can you take a look at this asap

.Refer to our agent manual for a full list of email action codes you can use
