

New Feature: Mobile Text Alerts

Ben Henley - Comment (1) - Product - 2014-08-11

Your helpdesk is often the front line when it comes to detecting a serious outage or keeping a vital customer. Unfortunately, problems don't always happen when you're in the office

DeskPRO already has a sophisticated notification system which can keep you up to date via email or our smartphone app. Now we've added the ability for your helpdesk to reach you by SMS text message, so you can receive alerts even when you have a one-bar signal and .hotel Wi-Fi

You decide exactly who gets which alert and when; sending SMS is configured with .DeskPRO's powerful automation system

Actions ?

then	The following actions will run:
Message:	<div>ALERT: # {{ ticket.id }} {{ ticket.subject }} has failed critical SLA</div> <div>34 characters + {{ ticket.id }} + {{ ticket.subject }}</div>
To Agent(s):	<div><input checked="" type="checkbox"/> Assigned Agent</div> <div><input checked="" type="checkbox"/> Following Agents</div> <div><input type="checkbox"/> Annie Kline</div> <div><input type="checkbox"/> Chris Syrah</div> <div><input type="checkbox"/> Susie Blake</div> <div><input type="checkbox"/> Sean Brown</div> <div><input type="checkbox"/> Mark Heath</div> <div><input type="checkbox"/> Ninella Himlet</div>
To Team(s):	<div><input type="checkbox"/> Assigned Team</div> <div><input type="checkbox"/> 1st Level Support</div> <div><input checked="" type="checkbox"/> 2nd Level Support</div> <div><input type="checkbox"/> Support</div>
To Department(s):	<div><input type="checkbox"/> Sales</div> <div><input type="checkbox"/> Support</div> <div><input type="checkbox"/> Partnerships</div> <div><input type="checkbox"/> Media Requests</div>

You can send an SMS as an action from a trigger, escalation or SLA, so you have the .flexibility to make sure you only get woken up when it's really important

To add this new feature we leveraged DeskPRO's powerful apps framework: just install the app for your SMS provider to get started. (There's full details of how to set up SMS in the [agent manual](#))
