

Set a User's organization automatically with a new Trigger Rule

(Lara Proud - Comment (1) - Product (Admin - 2022-09-20)

Apply a User's organization automatically using our new **Set Organization** trigger. This new Trigger has been added to the Trigger Rule Builder so you can create or update a .User's organization effortlessly

You can build this new rule to your workflows by constructing new triggers or adding it to .existing ones. Go to **Business Rules > Triggers** to apply this to your workflows

This will help you to set Users' organizations more efficiently by automatically applying a .trigger to link them as a member
