More filter options for text box custom fields Collecting Feedback

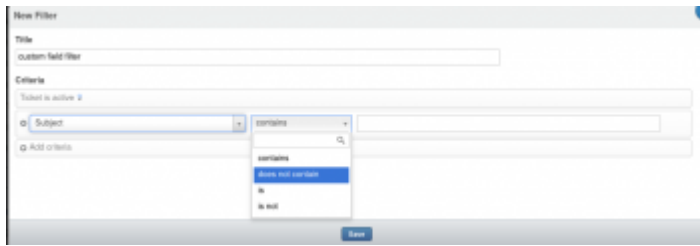

- Ahmad Sahrizal
- **Forum name:** #Feature Request

If we create a custom field with field type Single-line Text Box or Multi-line Text Box.

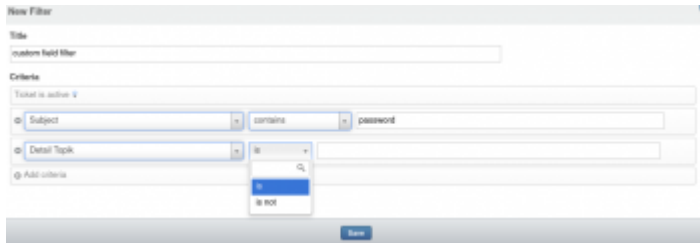

Field Type	<a href="#">Single-line Text Box</a>
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Detail Topik"/>
Alias	<input type="text" value="detail-topik"/>
Field Type	Multi-line Text Box
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Summary Permintaan"/>
Alias	<input type="text" value="summary-permintaan"/>
Description	<input type="text" value="Ringkasan permintaan dari user"/>

The content of this field is free text, just like the content of **Subject** field.

When we create a Filter, for **Subject** field there is four option: **contains, does not contain, is, is not**

But, for a custom field with type is Single-line Text Box or Multi-line Text Box, we just have two options: **is** and **is not**.

Could we add the option: **contains** and **does not contain** when we make a filter using a custom field with type: single-line and multi-line text box.
