Multiple Helpdesks Integration Archived

- Anand Athi
- **Forum name:** #Feature Request

As I noted to Chris on a ticket #2767-MPEG-5774, we're looking for the ability to manage multiple business names under one helpdesk. We're looking for Deskpro to be able to separate the frontend for clients from the backend, so that we can install multiple frontends on different domains, while all of them route to a single administrator interface.
