

## I'm having trouble making a custom report retrieve phone numbers

Ben Henley - 2018-04-17 - Comments (0) - Using Deskpro

### **Question:**

I had a custom report that retrieved people's phone numbers using `people.contact_data.field_x`. Now it has stopped working - why?

### **Answer:**

The way we store phone number data for people (users and agents) has changed. You should now use the `phone_numbers` table [which is documented here in the Reports manual](#).
