Warnings during update (via CLI-Updater) Finished

- Christopher Callaham
- **Nom du forum:** #Feature Request

Every few upgrades I get warnings in the command line upgrader

 Warning:
rmdir(C:\inetpub\wwwroot\betadesk/app/sys/cache/twig-compiled\54): Directory not
empty in C:\inetpub\wwwroot\betadesk\app\vendor\symfony\src\Symfony\Comp
onent\HttpKernel\Util\Filesystem.php on line 98

 Warning:
rmdir(C:\inetpub\wwwroot\betadesk/app/sys/cache/twig-compiled\49): Directory not
empty in C:\inetpub\wwwroot\betadesk\app\vendor\symfony\src\Symfony\Comp
onent\HttpKernel\Util\Filesystem.php on line 98

 Warning:
rmdir(C:\inetpub\wwwroot\betadesk/app/sys/cache/twig-compiled): Directory not
empty in C:\inetpub\wwwroot\betadesk\app\vendor\symfony\src\Symfony\Comp
onent\HttpKernel\Util\Filesystem.php on line 98

 I think the upgrade actually
finishes but I don't know if it causes any issues when they happen.
