Download ticket results as CSV

Christopher Nadeau - 2023-08-17 - [Commentaire \(1\)](#) - [Agent](#)

Download ticket queue/list results

The easiest way to download tickets is by running a queue or list from the agent interface. When results load, switch to the table view and then click on the CSV button on the bottom left.

The screenshot shows a user interface for a report. At the top, there is a blue icon with three horizontal lines, representing a table or list, which is highlighted with a red box. Below this is a table with the following data:

<input type="checkbox"/>	ID	Subject	Agent
<input type="checkbox"/>	196	Problem reading the meter (Email)	 U
<input type="checkbox"/>	195	Need help with reading the meter	 A

Below the table is a large empty grey area. At the bottom left, there is a red box containing a document icon with the text 'CSV' next to it, indicating a download option.

Download tables generated from a report

You can create a stat (or use a built-in stat) to generate a *table* report. From here, you may download the results as CSV.

Refer to the full reporting guide for information on using reports: [Using the Stat Builder](#)

Using the Deskpro API

If no other option provides the flexibility you need, then you can use the Deskpro API. Refer to the developer guide here: [About the API](#)
