

## DeskPRO v3.1.0 Released

2007-11-27 - Chris Padfield - Commentaire (1) - Release Announcements

We are pleased to announce the release of DeskPRO v3.1.0.

DeskPRO v3.1.0 introduces a number of major improvements on v3.0.x as well as a range of more subtle improvements. Major features include:

- \* Sub categories for categories and custom select fields
- \* Automatic searching of the knowledgebase upon ticket submission
- \* Custom fields dependent upon the category, for example have custom fields that only apply to a particular support category or sales enquiry
- \* Authentication from multiple external databases including LDAP, vBulletin, etc
- \* An improved look and feel for the tech and admin interface
- \* A completely new reporting system with thousands of pre-configured statistics as well as the ability to create your own custom ones
- \* A new knowledgebase management system to make it easy to organise and manage knowledgebases of all sizes
- \* Introduction of companies and user groups to aid in user management

We have created a PDF brochure that explain some of the new features in DeskPRO v3.1.0.
