

## On-Premise Controller Release 2.23.1

2025-02-13 - Lara Proud - Commentaire (1) - OPC Releases

This update enhances the reliability and customization of your On-Premise environment by addressing key issues and refining system configurations.

### Latest Improvements

- ☐ Removed certain pre-installed packages from digital marketplace images

### Bug Fixes

- ☐ Ensured custom Deskpro configurations are loaded correctly.
- ☐ Fixed MySQL to correctly load timezone data when absent and ensure permissions are correct.

## On-Premise Controller Version 2.23.2

Bug Fixes

- ☐ Fixed issues with binary compilation for ARM architecture.
