How can I best manage Out of Office Agent accounts?

Sean Kerwin - 2023-10-06 - Comments (0) - Admin

This article has some suggestions for handling an agent going on vacation.

## **Out of Office replies**

When an agent sets an automatic "out of office" message, you may get tickets created every time the message is sent.

The best way to handle these is to create a New Ticket trigger that will automatically delete the unwanted tickets, go to **Admin > Business Rules > Triggers**, and click the **New** button in the top right.

dd: New Trigger			
<u> </u>

## Monitoring replies to the agents' assigned tickets

Create

You may want to have the agent unassign all their tickets before they go away and have them assigned to other agents. Another way to handle this is to make sure that all their tickets are assigned to a team, so other members of the team can monitor any replies.

Cancel

If you don't want to change any assignments, an Admin can create a <u>custom queue</u> that shows you all the agent's tickets that have the status **Awaiting Agent**, or Agents can create a Ticket List. This makes it easy to spot when a user replies while the agent is away.

## **Round robins**

Ensure that any Round Robins the Agent is part of are set to **Only assign to Agents that** are online.
