If your agents are using the CRM app to record which users are managers of their organizations, you could use this information to increase the urgency of managers' tickets:

Event	When a new ticket i ✓ By a user — ✓ via the web ¢ — ✓ via email	s crea	bughout the admin interface to reference				
Event	<ul> <li>✓ By a user</li> <li>– ✓ via the web </li> <li>– ✓ via email</li> </ul>		ited	🗹 By an a

Note that the trigger makes the ticket more urgent if the user is a manager, or belongs to the VIPs usergroup. It increases the urgency by 5, up to a maximum of 10.
