If we create a custom field with field type Single-line Text Box or Multi-line Text Box.

The content of this field is free text, just like the content of **Subject** field.

When we create a Filter, for Subject field there is four option: contains, does not contain,

is, is not ×

Could we add the option: **contains** and **does not contain** when we make a filter using a custom field with type: single-line and multi-line text box.
