Users with spaces in last name not displayed properly on User Portal Finished

- Eric VanTol
- **Forum name:** #Bug Report

When a user has a space in their last name, let's say for instance, Vincent van Gogh, the user's name displays on the user portal as "Welcome back Vincent van". There should be separate storage in the persons table for first and last name.

Thanks for the suggestion, Eric. We have implemented a change that handles this, now on the Help Center the user's full name will be displayed under the dropdown menu when they log in which ensures names aren't cut off.
