When viewing a ticket in the user portal, add option to show all messages on one page (remove pagination) Collecting Feedback

- Marion Abramo
- **Forum name:** #Feature Request

Our customers would prefer to be able to see all ticket messages on one page when viewing their tickets within the user portal. We have some tickets with over 100 messages, so it would be useful for them to be able to easily scroll through all of the messages rather than having to click through the pagination.
