

You can now search against custom fields to locate tickets

2022-12-06 - Lara Proud - Comments (0) - Product (Agent)

Our Global Search app now supports searching against your helpdesk's ticket custom fields, making it easier to locate specific tickets in the helpdesk when using the search functionality.

We have added the ability to run searches against ticket custom fields, including:

- Single-line text fields
- Multi-line text fields
- URL fields
- Number fields
- Currency fields

If you've added information to one of these custom field types, you will be able to locate a ticket by searching for the field's content.

In this example, the ticket contains the custom ticket field **Account Number** that is 2579:

Agent: Agatha Bardle
 Team: 2 mos
 Followers: 4 wks

Next event: -
 Ticket Open: 2 mos
 User Waiting: 4 wks

Agatha Bardle
 agathabardle@example.com

cc + Add

Ref
 ZLRV-4282-VJDP

Brand
 221B Energy

Department*
 Customer Support - USA

Language
 English

What are you hoping to get in touch about?
 Updating an existing account

Account Number
 2579

When using Global Search, entering 2579 returns the ticket that references the **Account Number** custom ticket field in the ticket properties:

Search

2579

Filter Sort: Date Updated

Tickets (1)

247 Change payment information
 Agatha Bardle <agathabardle@example.com> 3 2 mos

We added this to make locating specific tickets with the Global Search app easier, increasing the feature's usefulness.

On-Premise Customers will need to repopulate their Elasticsearch Index after

upgrading.
