Deskpro

ticket fields issue. Finished

- michael Offenbecher
- **Fórum neve:** #Bug Report

I know you know this but I just thought i would create a ticket for it.

 When submitting a ticket as a user the ticket fields do not show up correctly. The date/time show up as random numbers that will not make sense to the user. It also changes the order of items form the original form they just filled out. It also leaves fields there were filled out empty.

 Thanks

 Mike
