Custom date field not working with format function

Ben Henley - 2023-08-01 - [\(0\) megjegyzés](#) - [Creating Reports](#)

Question:

I'm trying to create a report that includes information from a custom date field:

```
SELECT DATE_FORMAT(tickets.custom_data[1]), '%Y-%m-%d') AS 'Date'
```

However, the result table only displays *None* for that column. How can I fix this?

Answer:

Custom date fields contain integer timestamp values, so before you use the `DATE_FORMAT` function, you first have to convert to real dates using `FROM_UNIXTIME`:

```
DATE_FORMAT(FROM_UNIXTIME(tickets.custom_data[1]), '%Y-%m-%d') AS 'Date'
```
