Deskpro 2018.1 Release

2018-05-21 - Benedict Sycamore - [\(0\) megjegyzés](#) - [Deskpro Releases](#)

We're delighted to announce the release of Deskpro 2018.1

Deskpro 2018.1 includes the product updates, new features, bug fixes, and additional company updates listed below:

New Release Numbering

We've changed how we number Deskpro versions and release announcements. You can read more about why and what that means [here](#).

SSL Available as Standard

We've enabled SSL for all cloud customers. Find out more about that [here](#).

New Reports

We've completely updated Deskpro Reports with new features, functionality, interface and more. You can read [this post](#) to discover everything you need to know about new reports.

Multibrand Update

We've made a number of significant changes and improvements to the way multibrand works in Deskpro. Check them out [here](#).

Improvements

DP-1620: It is now possible to translate custom field choice items

DP-999: New field type added: File
