## Deskpro 2019.7.2 Release

2019-09-11 - Christopher Nadeau - (0) megjegyzés - Deskpro Releases

We are pleased to announce the release of Deskpro version 2019.7.2. This is a hotfix release to address two bugs as described below.

## **Bug Fixes:**

- CH-2682 Rendered raw HTML in exception message: A 404 error message could render raw HTML from the path provided.
- CH-2710 Article editor opens content of another article: When multiple articles are open at the same time, clicking "edit" will always have the content of the first article.
