Deskpro 2020.2 Release

2020-07-19 - Grace Howlett - (0) megjegyzés - Deskpro Releases

16th November 2020 - 2020.2.12

• Fixed Messenger code widget sometimes not working on external domains

5th November 2020 - 2020.2.11

• Fixed input sanitization on a public portal API

30th October 2020 - 2020.2.10

• Fixed CSRF errors for non-https helpdesks.

21st October 2020 - 2020.2.9

- [Messenger] Chat messages covering up user info in agent interface
- [Messenger] Agent 'display name' not being used
- [Messenger] A prompt to submit a new ticket might appear in the middle of an active chat
- [Messenger] Added "DeskProMessenger.loaded" event that the parent page can listen on to be otified of when messenger widget is loaded
- [Messenger] Added "window.DeskProMessenger" object to the parent page with methods: open, penChat, openNewTicket, and toggle.
- [Messenger] Added messenger option "disableButton" that may be set to false in the widget code to hide
 the default button (normally would be used in conjunction with custom code to pen the widget on some
 other custon event).
- [Messenger] Numerous tweaks to messenger task router and locking mechanism to fix possible onflicts or lag with locks
- CH-17997 Fix deleting ticket blobs via mass actions
- Multiple fixes and tweaks to Guides

19th October 2020 - 2020.2.8

- Security fix: Fixed an issue that could allow a specially crafted URL to trick some Windows hosts into serving files that reside outside the web root if the path on the filesystem was known and the file ended with a common user file extension (html, js, css, txt, log, pdf, doc, yml, ini, json etc. but NOT .php).
- DPLEG-20 Fixed issue with News subscriptions not sending on categories that only had "Registered" usergroup permission
- Fixed issue with Guides helpcenter API returning too-big payloads

5th October 2020 - 2020.2.7

- Fix Estonian flag
- CH-18005: 'Undefined index: token' for some customers using Exchange email account type

29th September 2020 - 2020.2.6

Improvements:

• CH-17842-OAuth 2.0 support for Office365 (you can read more about this in our news post).

Bug Fixes:

- CH-17813 Error saving Messenger settings if Knowledgebase is disabled.
- CH-15671 Unable to change permissions in Messenger for non-default brands.
- CH-17709 Problem creating new chats in Messenger from widget.
- CH-15285 Knowledgebase search showing on Messenger when it is disabled.
- CH-15420 Category and product fields showing incorrectly on the user form if no options are available for the user.
- CH-17851- Some agents are unable to accept incoming phone calls.
- CH-17668 Certain changes to the Helpcenter theme can cause an issue with CSS and styles.
- CH-11941 Some images are not loading correctly when they were added to the Helpdesk via copy/paste method.
- CH-17944 Embedded ticket form fails on Chrome with CSRF error

1st September 2020 - 2020.2.5

Bug Fixes:

- CH-17482 Escalation criteria sometimes won't save.
- CH-17447 Ensure the portal templates fallback mechanism is working if there is an issue flagged by the sandbox feature.
- CH-17177 When custom logic is applying to a field in a department layout, the field cannot be set/edited.
- CH-16250 Ensure the correct default email addresses are being used for each brand.
- CH-17452 Email Templates editor is broken when Deskpro is installed in a subfolder.
- CH-16979 The 'Ticket New Reminder' email template preview displays a 500 server error.
- CH-4240 Ensure the new email templates editor detects all phrases and displays them in a blue box appropriately.
- CH-16517 The wrong timezone conversion is being used for datetime fields in reports.
- CH-17482 Fix the missing ticket deflection translation strings on the Help Center.
- CH-14512 Calendar widget used for the date field on the Help Center doesn't update when the user manually types in a date.
- CH-14886 Fix Facebook authentication on Help Center.
- CH-17381 When an organization field is being used in a ticket form layout, the ticket properties cannot be edited via the portal for an existing ticket.
- CH-16980 Attempt to limit user-supplied host names from using internal services.
- CH-17506 Fix typo in table name which can cause a helpdesk reset to fail.
- CH-16842 and CH-15783 Unable to save rate limits on API keys.
- CH-14661 Distinguish between a negative and no rating for Chat satisfaction in API V2.
- CH-17210 RuntimeException:0 Failed to send Pusher events.
- CH-17234 The form's view data is expected to be an instance of class Application/DeskPRO/Entity/Blob, but is a(n) string.
- CH-17382 Fix error: Call to a member function getId() on null (/app/src/Application/AgentBundle/Controller/NewsController.php:514.
- CH-17316 Fix error: [EXCEPTION] Exception:0 DateInterval::_construct(): Unknown or bad format (P900S).
- CH-17209 Fix error: [EXCEPTION] InvalidArgumentException:0 Attempt to save a blob without authcode (/app/src/Application/DeskPRO/Entity/Blob.php:935) count()=1.0 .
- CH-17135 Fix error: [EXCEPTION] Symfony\Component\Debug\Exception\FatalThrowableError:0 Call
 to a member function getId() on null
 - (/app/src/Application/AgentBundle/Controller/KbController.php:1168) count()=3.0.
- CH-17107 Fix error: [EXCEPTION] Application\DeskPRO\RefGenerator\RefGeneratorException:0
 Cannot find unique ref after 101 attempts with pattern DISX-<###>. Aborting.
 (/app/src/Application/DeskPRO/RefGenerator/CustomRef.php:182)
- CH-17123 Promote a read-only filesystem.
- CH-16869 Prevent memory exhaustion when resizing images.

14th August 2020 - 2020.2.4

Bug Fixes:

- CH-17028: Possible error during sending of custom new email template
- Several improvements to template sandbox to allow more callable methods on custom temlpates

30th July 2020 - 2020.2.3

Bug Fixes:

- CH-16805: Instances with thousands of custom templates might break during upgrade due to a memory error during re-compiling step
- CH-16821: An agent could craft a special news article such that raw HTML got output in the News carousel, even if that agent did not have permission to use "any html".
- CH-16942: Fix cascading dropdown menu in helpcenter

28th July 2020 - 2020.2.2

Bug Fixes:

 CH-16734 - Agents with login alert email notifications would see an error after login due to new email template sandboxing.

27th July 2020 - 2020.2.1

Bug Fixes:

• CH-16740 - Relative time criteria in Filters has stopped working.

20th July 2020 - 2020.2

New Features:

The following features have been automatically available for new customers and available for existing customers to test for a few months, however, we are officially launching these today:

- New <u>Help Center Theme</u> for the portal.
- New Messenger widget.
- Improved Email Templates (including a new template editor).

Additionally, we have some other exciting new features available from today:

- Control whether Pending status is counted in SLAs and ticket waiting times. Find out more here.
- Report on user waiting time and first reply time within working hours. Find out more <u>here.</u>
- Trigger criteria for custom date fields now support selecting a relative time in the future (e.g 2 days/months/years from now).

Bug Fixes:

• CH-15792 - Intermittent error caused when a user approves/rejects an Approval request via the portal.

- CH-6074 Prevent Agent permissions from causing an error when an Admin tries to add an Approval type.
- CH-14658 Ensure the default values for built-in fields (e.g. Category or Product) are displayed in the contact form when a parent/child hierarchy is being used.
- CH-14823 If you apply a Macro from the reply button which should send a reply and unassign the ticket, the ticket is not changed to 'unassigned'.
- CH-15662 The toggle to enable/disable Guides for the portal isn't working.
- CH-11022 The Snippet manager closed automatically after clicking the 'Languages' menu when a language pack has been uninstalled.
- CH-15431 Don't display the shortcut code for snippets that are removed when a language pack is uninstalled.
- CH-13738 Fixed the "Requested unknown parameter" error which occurred when adding particular built-in stats as widgets to a dashboard.
- CH-15452 Unable to successfully drag an attachment from a ticket to desktop.
- CH-15672 When a cron job fails, don't retry until the next interval.
- CH-15441 Add CSRF token on profile/emails?remove email
- CH-15680 InvalidArgumentException:0 (/app/src/Application/DeskPRO/Entity/Ticket.php line 4675): 50147 is not an agent.
- CH-15205 Fixed the error "Call to a member function setDateExpire() on null".
- CH-16055 Missing unique key in user chat queue targets.
- CH-15720, CH-15024, CH-15233, CH-15502, CH-15062 Security enhancements and fixes.
