

## Option to disable CSP headers (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

Under **Admin > Server > Server Settings** there is now a checkbox to disable CSP headers. CSP is enabled by default.

The screenshot displays the Admin Dashboard on the left sidebar and the Server Settings page on the right. The sidebar menu includes: Admin Dashboard, Setup, Agents, Tickets, CRM, User Interface, Chat, Apps, Tasks, Server (expanded), Server Settings (selected), ElasticSearch, Report File, and Server Requirements. The main content area is titled 'Server Settings' and contains two sections: 'Cookie Settings' and 'Content Security Policy (CSP)'. Under 'Cookie Settings', there are input fields for 'Cookie Path' (containing '/') and 'Cookie Domain'. Under 'Content Security Policy (CSP)', there is a checkbox labeled 'Disable CSP headers' which is currently unchecked.
