More sort options in CRM/Feedback/Publish modules Collecting Feedback

- Eric VanTol
- **Forum name:** #Feature Request

The sorting abilities within the various modules leaves a bit to be desired, particularly for CRM components like users and orgs. I'd like to be able to not only sort, but order the results. For instance, while I can sort by Date Created in the org and user sections, I cannot change the order criteria, so if I want to see a list of users created in descending order (from today to previous days) I have to click on the little page arrow 60 times because we have 3000 users.

When viewing the members in an organisation, the list isn't sorted into alphabetical order.

It would make finding a person when you can't remember their name properly (to search on) easier, especially on a company with a lot of contacts.
