Deskpro Horizon Release 2024.27

2024-07-02 - James Godwin - Comments (0) - Deskpro Releases

We're pleased to announce the release of Deskpro Horizon, version 2024.27. This release includes several improvements to product functionality and bug fixes.

| Latest Improvements To improve agent experience when making changes to tickets that will result in the agent losing visibility of the ticket (i.e. assigning it to a department they don't have permission to view). We have added a menu to warn agents before they make the change to ensure they're aware of the action (SC 152353). |
|--|
| \square To make it easier to diagnose issues with tickets we have added dumps of the ticket_filters2 table to the ticket debug file (SC 154454). |
| ☐ We have added support to query against the people_orgs table in Reports and using the API. This allows you to query all the different organizations a user is in (SC 152185). |
| Bug Fixes Users created during the creation of an organization will now inherit the organization's usergroups and thus will have the associated permissions (SC 152754). |
| \square We have fixed the mobile app so agents can edit radio button fields (SC 153422). |
| $\ \square$ The ticket properties panel has been fixed so that when agents adjust the width of the panel the context will adjust to the available space (SC 150282) |
| $\hfill \square$ When a queue is grouped the sub-queues will now display in alphabetical order in the navigation panel (SC 153101). |
| $\hfill \square$ We have fixed an issue with the Round Robin admin menu that prevents admins from editing the title (SC 151447). |
| ☐ We have resolved an issue with displaying the correct Ticket subject on the various social |

 $\hfill \square$ Now when users view tickets on the Help Center they will be able to see images sent with

On-Premise Controller Release [2.19.0]

We are also delighted to announce the latest version of the OPC, [2.19.0]. This version includes new features and some general improvements that will provide an increased level of administrator capabilities.

□Handle the case of incompatible database dumps from the latest versions of MariaDB (SC 155152).

Bug Fixes

Update container default networking configuration to restrict access to internal port-based routing that could be abused in some environments (SC 156129).
