

Option to disable CSP headers (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

Under **Admin > Server > Server Settings** there is now a checkbox to disable CSP headers. CSP is enabled by default.

The screenshot shows the Admin Dashboard with a sidebar on the left and a main content area on the right. The sidebar contains the following menu items: Admin Dashboard, Setup, Agents, Tickets, CRM, User Interface, Chat, Apps, Tasks, Server (expanded), Server Settings (highlighted), ElasticSearch, Report File, and Server Requirements. The main content area is titled 'Server Settings' and contains two sections: 'Cookie Settings' and 'Content Security Policy (CSP)'. The 'Cookie Settings' section has two input fields: 'Cookie Path' (containing '/') and 'Cookie Domain' (empty). The 'Content Security Policy (CSP)' section has a checkbox labeled 'Disable CSP headers' which is currently unchecked.
