Tickets by user split by brand Report

- Matthew Wray
- **Forum name:** #DPQL Reports

This report gives you a list of tickets by brand and associated user information:

```
SELECT tickets.id, tickets.person.name, tickets.person.emails.email  
FROM tickets  
SPLIT BY tickets.brand.name
```

Note that as we're using SPLIT BY you can export the ticket lists for each brand separately:

Download as CSV

Brand A

ID	Name	Email
833	test	test@example.com

Reset order | Showing 1 to 1 of 1 entries

Download as CSV

Brand B

ID	Name	Email
834	test	test@example.com

Reset order | Showing 1 to 1 of 1 entries
