

Added Hijri calendar (Arabic) for custom date fields (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

You can now choose between the option to use a Gregorian or Arabic calendar for custom date fields.

The screenshot shows a user profile configuration interface. At the top, there are fields for 'Agent' (John Doe), 'Team' (None), and 'Followers' (Broderick Mori). Below these are 'Labels' (bartell inc, bayer-o'kon, flatley-bednar, hahn ltd, kessler) and 'Language' (French). A 'New Calendar' field is present, and a 'Widget Type' dropdown is open, showing a Hijri calendar widget. The widget's description is in Arabic, and it displays a calendar grid for the month of Jumada al-Akhir, 1438. The grid shows days of the week (ن, ث, ر, خ, ج, ع, ح) and dates from 1 to 28. The date 11 is highlighted. At the bottom of the widget are 'إغلاق' (Close) and 'ممسح' (Delete) buttons. The main configuration page has 'Save' and 'Cancel' buttons at the bottom right.
