

## Deskpro Horizon Release 2024.20

2024-05-14 - James Godwin - Comments (0) - Release Announcements

We are delighted to introduce Deskpro Horizon, version 2024.20. This release introduces two dynamic integrations that significantly enhance Customer Relationship Management. We've streamlined several of our app interfaces for a smoother user experience and have resolved several bugs. These updates should help provide a more seamless process when using Deskpro.

## **New Features**

<u>Enhance customer relationship management with Deskpro's Dynamics365 and Bitrix24</u>
<u>Integrations</u>

Deskpro's integration with <u>Dynamics365</u> and <u>Bitrix24</u>, we've optimized how your team can interact with and manage your customers.

These integrations streamline processes, improve communication, and aid in delivering superior customer service.

## **Latest Improvements**

🛮 Enhanced Deskpro Email Templates to support	the function	, this will	
ow you to display the relative time between dates. For example, the function			
	expresses the time since	xpresses the time since a ticket was	
created (SC 150278).			
☐ We improved the organization of Lists, you can navigation reducing the noise for the Lists you do access to frequently used lists (SC 129658).	·		
$\hfill$ The $rac{TeamViewer}{Impulsion}$ app will now support agents craddition to, instant sessions (SC 148800).	eating sessions with a s	ubject set, in	
☐ The <u>Azure DevOps</u> app has been enhanced with	the following updates:		

- Improved the button UX to enhance ease of navigation in the app (SC 141569)
- Improved the handling of large instances (SC 144672)

$\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ $
☐ Deskpro's <u>Scratchpad</u> app now supports markdown for text formatting (SC 142859).
☐ We have improved the <u>Salesforce</u> app, sections for objects will now be visible even if they are empty, allowing agents to access the create button (SC 148306).
<b>Bug Fixes</b> ☐ Resolved an issue with running Macros that use Snippets with multiple translations while creating a ticket. Now when an agent uses a Macro that applies a Snippet, where possible the translation for the language set in the ticket will be used (SC 142011).
$\hfill\Box$ Ticket Templates created by Admins who have since been deleted will still be available to create tickets with (SC 145311).
$\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ $
$\hfill \square$ We fixed an issue to ensure email reply code blocks are not visible if an agent does not have a signature set (SC 140961).
$\hfill \square$ Resolved an issue where CSV exports of Snippets would be broken where Snippets contained double-quoted text (SC 140636).
☐ Agents are now able to remove the default value for a select field (SC 148639).
☐ We fixed an issue where too many recipients on an email sent to the Helpdesk would cause the CCs to be displayed incorrectly on a ticket message (SC 149616).
$\hfill \square$ We have fixed an issue that impacted the export of Help Center themes (SC 129354).
☐ We fixed an issue with the <a href="Basecamp">Basecamp</a> app that caused some projects not to appear in the dropdown when creating a card (SC 147460).
