Handle re-sizing Guide content better for different screen sizes Finished

- DT Dave Topan
- **Nome del forum:** #Feature Request

On the Portal, the width of the Guides doesn't adjust depending on the screen size. This means that text is still shortened and less legible, even though there is space to be used.

The screenshot shows a Help Center interface. On the left is a navigation menu with categories: 'APPLICATION AND ROLE R...', 'FILE RESTORE', 'POLICIES', and 'SYSTEM SPECIFIC RECOVER...'. The 'POLICIES' section is expanded to show 'Backup Policy'. On the right is the main content area for 'Backup Policy', which includes a 'CONTENTS' table of contents with 'I. Purpose and Scope' highlighted. The main content area shows the title 'Backup Policy', publication and update dates (21/10/2019), and a section titled 'I. Purpose and Scope' with a bulleted list of policy goals. A note at the bottom states: 'This policy applies to all computers, laptops, tablets and desktops owned by...'

Thanks for this suggestion, it has been implemented on Help Center. When you adjust the screen while looking at a Guide, the content will now adjust to fit the width of the browser to ensure it can still be read. The table of contents on the left-hand side will be stacked above the guide content and collapsed into a menu so it can still be accessed easily if you need to jump somewhere else in the guide.
