More filter options for text box custom fields Collecting Feedback

- AS Ahmad Sahrizal
- **Nome del forum:** #Feature Request

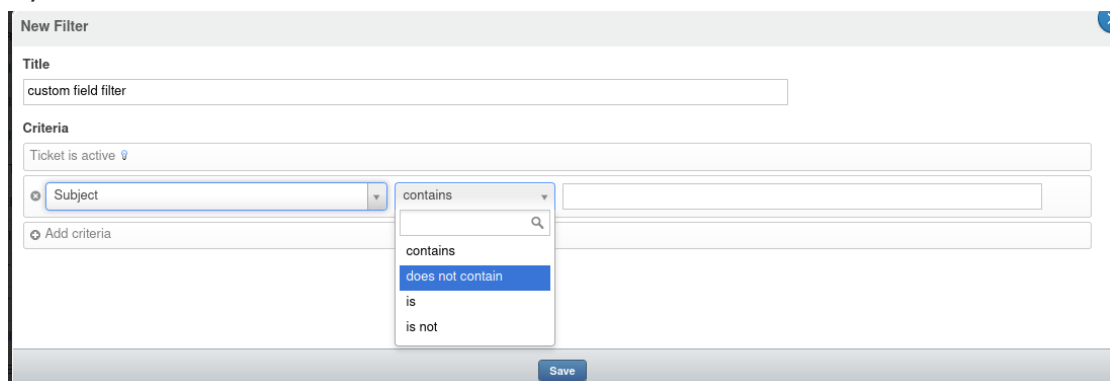

If we create a custom field with field type Single-line Text Box or Multi-line Text Box.

Field Type	Single-line Text Box
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Detail Topik"/>
Alias	<input type="text" value="detail-topik"/>

Field Type	Multi-line Text Box
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Summary Permintaan"/>
Alias	<input type="text" value="summary-permintaan"/>
Description	<input type="text" value="Ringkasan permintaan dari user"/>

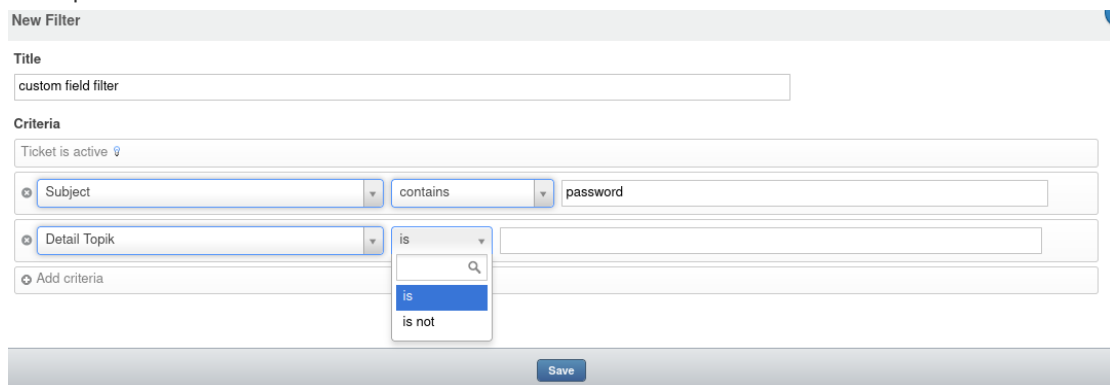

The content of this field is free text, just like the content of **Subject** field.

When we create a Filter, for **Subject** field there is four option: **contains**, **does not contain**, **is**, **is not**

The screenshot shows a 'New Filter' dialog box. The 'Title' field contains 'custom field filter'. Under the 'Criteria' section, the first criterion is 'Ticket is active'. The second criterion is 'Subject' with a dropdown menu open showing four options: 'contains', 'does not contain', 'is', and 'is not'. The 'does not contain' option is highlighted. There is a 'Save' button at the bottom right.

But, for a custom field with type is Single-line Text Box or Multi-line Text Box, we just have two options: **is** and **is not**.

The screenshot shows the 'New Filter' dialog box with two criteria. The first criterion is 'Subject' with the operator 'contains' and the value 'password'. The second criterion is 'Detail Topik' with the operator 'is' and an empty text box. A dropdown menu for the second criterion is open, showing 'is' and 'is not' options. The 'is' option is highlighted. There is a 'Save' button at the bottom right.

Could we add the option: **contains** and **does not contain** when we make a filter using a custom field with type: single-line and multi-line text box.
